DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-16, drawn to micro-electro-mechanical system, classified in class 257, subclass 415.
 - II. Claims 17-24, drawn to method of manufacturing a micro-electro-mechanical system, classified in class 438, subclass 50.
2. Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as claimed can be made by another and materially different process. For example, instead of removing a portion of the sacrificial material, the sacrificial material can be selectively provided to suspend the nanotube article.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the

Art Unit: 2823

application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

5. During a telephone conversation with Peter M. Dichiaro on Monday January 28, 2005 a provisional election was made without traverse to prosecute the invention of Group I invention, claims 1-16. Affirmation of this election must be made by applicant in replying to this Office action. Claims 17-24 withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

Allowable Subject Matter

6. Claims 1-16 allowed.

7. The following is an examiner's statement of reasons for allowance: the prior art does not anticipate nor render obviousness as to a micro-electro-mechanical system device having a nanotube vertically suspended in a conductive channel wherein the deflection of the nanotube is parallel to the major surface.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

8. This application is in condition for allowance except for the presence of claims 17-24 to group II invention non-elected without traverse. Accordingly, claims 17-24 been cancelled.

EXAMINER'S AMENDMENT

9. The application has been amended as follows: cancel claims 17-24.
